

Graduation

To graduate from Master and Ph.D. program students must be successful master and doctoral courses which have 60 ECTS for each program. Following the course period, these students must study a thesis which is determined with the supervision of an academic advisor. In addition to this study, if the thesis is accepted, a presentation of the thesis must be exhibited to a jury by the students.

SAKARYA UNIVERSITY

FACULTY OF ARTS AND SCIENCES

BIOLOGY
DEPARTMENT

LIFE in SAU

Sakarya where The Sakarya University is in is a popular touristic city in Turkey because of its impressive forests, Sapanca Lake and the Black Sea beaches.

Sakarya University which aims to consciously educate individuals was established in 1970 and is the only university that has an ISO-2002 Quality Certificate. Through the investment in Information Technology (IT) of Sakarya University, the IT development and processes have an important growth in Turkey.

Student exchange programs like "Farabi", "Erasmus" and "Mevlana" provide a facility of different educational and cultural recognition.

Sakarya University incorporates 165 different student communities each has different interests and more than 50.000 students.

SAU is a university that provides almost all facilities that are necessary for students in the campus area.

Missions

To train students who are well educated, qualified, and have the required properties for domestic and abroad; additionally, to ensure highly qualified research in the science field.

Visions

To produce new projects in various fields of biology which are appropriate for ethical rules and have an international quality that reflects today's and future's standards. Additionally, to support new scientists who aim to study and upgrade both national and international scientific information with these projects.

Our academic staff who can study with all model organisms have biological, molecular biology and genetics laboratory projects. In addition to this, field studies provide significant findings in the discovery of new species in Turkey, especially in Marmara.

The Department of Biology started to take a master's degree in the academic year of 2005-2006 and a doctoral student in the academic year of 2009-2010.
